Dhaara Smart (ISO Certified) Water flow meter

Dhaara Smart, A Smart Choice!

What makes us different ?

**Smart tamper detection
Accurate Data
In-house calibration
Plug & Play Device**

3 yrs

**Warrenty
Data Backup
Battery Life
Virtual Support**

**Address : - E-7/8/9 Devashree Garden, Near Sheetal Dairy, R. W. Sawant Marg, Rutu Park,
Vrindavan Road, Majiwada, Thane (W) - 400 601**

Sales - 9820735686 # Service - 8879524555 # Bore Well - 9167985686

Rain Water Harvesting - 8879223222

Product Information

IP68 enclosure

All weather protection for deployments in diverse environmental conditions.

Ultrasonic metrologic sensing

State-of-the-art flow sensing with auto event detection and auto signal calibrations.

Patented IoT

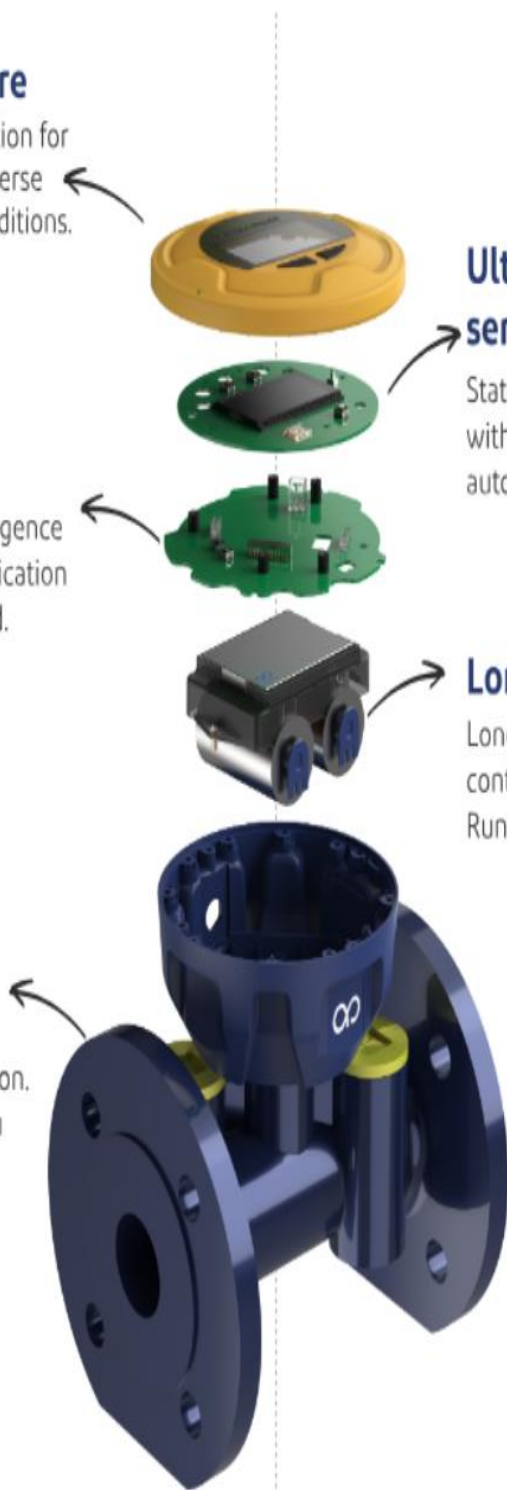

Low power multi-intelligence multi-protocol communication system - Patent granted.

Long battery life

Long durable batteries for continuous data collection. Runs for years and years.

Tamper-proof design

No more data manipulation. Tamper alarms notify you the intrusions.

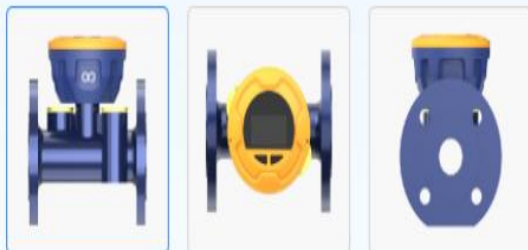

Dhaara Smart

The Dhaara is a new-age water meter that combines the power of IoT with the latest sensor technologies. The integrated telemetry and battery powered capabilities make it easy to manage your water consumption from anywhere and anytime (even when the power is down).

Dhaara Smart

Dhaara Smart is a battery-powered flow meter that uses ultrasonic technology to measure, capture, and report water flow. With built-in telemetry, the data can be accessed remotely on any computer or mobile device. Truly eliminating the need to visit sites or monitor data manually.

Ultrasonic transit time
principle

Inbuilt GPRS/4G
communication

Battery operated
No more wires

IP 68 rating
All weather protection

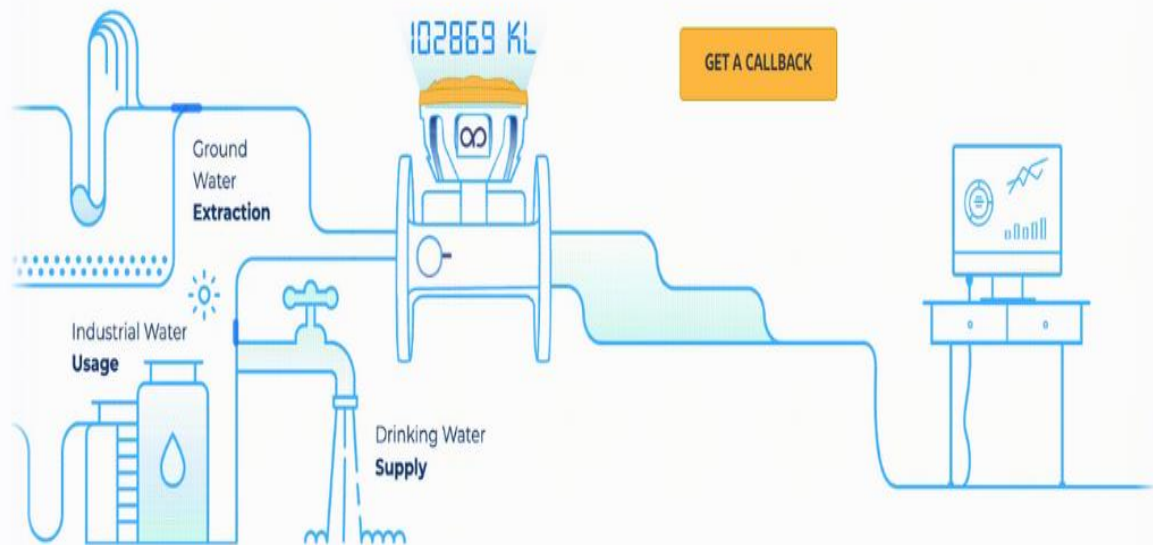

High accuracy
ISO 4064

Tamper proof
Automatic alarms

Shaping Water

Kritsnam is empowering companies with water intelligence. With Dhaara, a revolutionary water budgeting application, businesses can now objectively evaluate water risks and digitally manage their water footprint. Shaping water for a secure future.

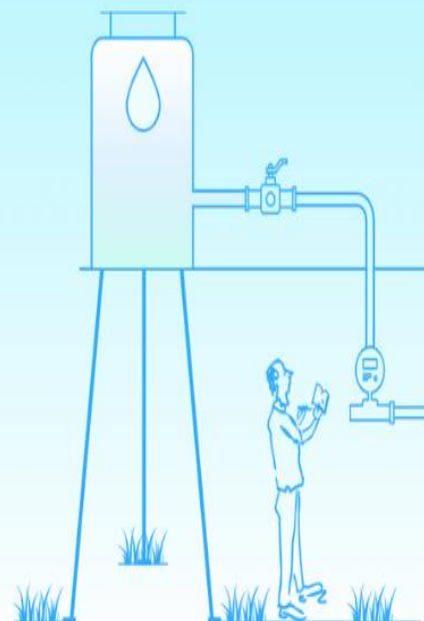

GET A CALLBACK

Goodbye to Manual Data

We understand your needs. Water management is not a hassle anymore!

At Kritsnam we are collaborating with businesses that are ready to adopt scientific water management practises to achieve sustainability. Our flagship product, Dhaara is a data-driven decision making tool for water managers that is designed to save water and save money.

Dhaara enables managers to first project an overall water budget plan of their organisation and then allow them to track their actual water usage with reference to that plan. It helps them to identify the gaps, potential weaknesses and eventually lead them to take corrective actions. Smart solution for a smarter you!

Our Solution

Data-driven digital water resources management

Advanced Water Meter

Dhaara Smart is a battery operated water meter that complies with Central Ground Water Authority (CGWA) and ISO standards. The water usage data is automatically recorded in an online logbook via 4G/2G telemetry.

ISO Certified
As per ISO 4064 standards

CGWA Compliant
Specifications as per CGWA guidelines

Online Logbook
No more manual data errors

Efficient Dashboard

Dhaara Live is a digital application that allows you to view, track, and analyze your water usage. Business users can visualise data and make informed operational decisions that contribute to the enterprise's water goals.

- Remote tracking**
Water consumption monitoring
- Customised reports**
Download & analyse
- Timely alerts**
Over-usage and leaks

End-To-End Data Protection

Make your business data completely secure with Dhaara. Our end-to-end security solutions create password-protected and encrypted services that restrict unauthorized access to your information.

- Data protection**
Two-factor authentication
- Encryption services**
Safer Data Transfer
- Password protected**
secured service
